Subject Index Volume 67 (1992)

acid recovery, 263
acrylonitrile co-polymer membranes, 287

Celgard porous polypropene membranes, 289
charged membranes, 283
chemical modification, 191
composite membranes, 273
coupled, facilitated transport, 107, 121, 133, 149

diffusion, 29, 75, 191, 273
dual sorption model, 191

electrochemistry, 83
electrolyte absorption, 211
electrolyte transport, 227

facilitated transport, 107
feed-complexing agent, 67
fiber membranes, 1
fouling, 93, 177, 249
functionalization, 289

gas and vapor permeation, 29, 75, 191
gas separation, 15, 75, 191
gas sorption, 75
generalized recycle system, 15
glassy polymers, 75

interpenetrating polymer network, 289
ion-exchange membranes, 57, 83, 211, 263, 273

liquid membranes, 107, 121, 133, 149
liquid membrane stability, 107, 121, 133, 149
liquid permeability and separation, 29, 167

membrane cleaning, 93
membrane modification, 249
membrane preparation, 263
membrane structure, 295
microporous and porous membranes, 167

Nafion membranes, 227

optimization, 15
organic separations, 167
osmosis, 83

parallel pore model, 227
percolation theory, 273
pervaporation, 1, 67, 167
pervaporation separation, 39
poly-(methacrylate) membrane intermediates, 289
poly(vinyl alcohol) membranes, 39
polyimide, 29
pore models, 211
porous membranes, 295
protein adsorption, 283

radiochemical grafting, 263
regenerated cellulose, 1

scanning tunnelling microscopy, 295
separation of ethanol/water mixtures, 39
separation of *m*- and *p*-xylene, 67
streaming potential, 57
stripping, 1
supercritical fluid, 29
supported liquid membranes, 107, 121, 133, 149
surfactants, 249

theory, 15, 177, 273
thermodynamics, 57, 83
thermoosmosis, 83
thermostable proteinase, 93
transport coefficients, 227

ultrafiltration, 93, 177, 249

water sorption and diffusion, 1, 167
whey, 93
